

Year 1 Curriculum in Environmental and Biological Sciences

Table of Contents

Content	
	About this course
	Summary of experiments and activities
	Next Generation Science Standards, Common Core Mathematics Standards, Standards for English Literacy

Units	
1	Introduction to the Computer and Keeping Laboratory Notes
2	Computational Thinking and Geometric Explorations using Logo
3	Investigating Energy and Charge in Electronic Circuits
4	Measuring Heat and Temperature
5	Analyzing, Interpreting and Evaluating Light Intensity Data
6	Investigating Heat Diffusion
7	Constructing Explanations and Communicating Results of the Heat Diffusion Experiment
8	Modeling the Heat Diffusion Experiment with Real World Extensions
9	Investigating Organism Growth in a Microbial Fuel Cell
10	Constructing Explanations and Communicating Results of Organism Growth Experiments
11	Modeling Organism Growth with Real World Extensions
12	Investigating Environmental Effects on Biological Systems
13	Constructing Explanations and Comparing Results of Environmental Effects on Biological Systems

Appendices:	
A	Glossary
B	References
C	Resources (including places to buy parts)
D	Spec sheets for sensors and boards
E	Logo Manual

Instructional Design Template for each Unit:	
1	Summary page
2	Objectives
3	Materials list
4	Common Core Standards
5	NGSS
6	Background Information (<i>Science concepts, Math concepts</i>)
7	Teacher preparation
8	Logo Vocabulary
9	Troubleshooting
10	Lesson (<i>Procedure, Foundations, Going Further extensions</i>)
11	Solutions (for teacher)
12	Wiring diagram (Foundation Experiment)
13	Data Analysis
14	Student Handout
